## About This Content

The Pyre Original Soundtrack packs close to two hours of original music by Supergiant's award-winning composer and audio director, Darren Korb. Featuring vocals by Darren Korb and Ashley Barrett, the album also contains bonus material and arrangements not found in the game.

**BONUS!** Also included is the Pyre Original Soundtrack Bonus Album Set, containing more than two additional hours of music by Darren Korb with vocals by Ashley Barrett, divided into two themed albums. 'The White Lute' features acoustic versions of many of the signature tracks from the game, while 'The Black Mandolin' features a variety of unique renditions of the song 'Never to Return', based on the different triumvirates players confront in the game.

Clever idea and looks great. it lets me play as an extermination super death empire and i like it. Great skin for my main, love that the snake taunt is fully playable, sometimes i just chill in the playtest to play it for fun. Plus the rotating colour schemes (bonus points for having my three fav colours) and the pixel effects are a nice touch  
Great skin to buy for Elli mains. I really dig this game! Play sessions are compartmentalized into little bursts... easy to pick up and play for just a minute at a time. There aren't enough games like this.

The game gets better and better as you play, and the developers did a wonderful job of expanding the game mechanics and keeping things fresh. I finished the game 100% but it is a feeling like I'm sad to be done, it was that much fun.

I like the streamlined UI which is large, easy to read, and gets you into battle quickly while communicating objectives fast. No needless BS, slowdowns, animations or clutter, just pure go-time. And the music, sound and presentation are exciting and go great.

Some have expressed concern about the large graphics and seemingly-cramped play area, but honestly I find that only adds to the speed, excitement and crispness required for good play.

I got this on sale for \$1 and I feel like I ripped them off.. Loved this game as a kid. So happy to find this for a bit of nostalgic gameplay.. This is fantastic, hopefully the dev will not abandon and steadily improve this.

Maybe it's just me, but I feel this game is very underrated just like the first one and deserves another look at by the community if for no other reason then just the soundtrack alone is brilliant, and if I remember correctly consists of music that is similar to the style of the parody of the musician you are currently dueling. (Spoiler!: look out for the smooth criminal in Hollywood) The artwork seems to have been improved as well in this version, but the same cheesy humor that is prevalent in the first game is still here and has only been enhanced. This whole style of dialogue is reminiscent of monkey island, which if you haven't guessed yet is one of my favorites. Don't buy this game for it's gameplay value unless you really enjoy Rhythm based games such as guitar hero or Dance dance revolution-esque gaming. However if you appreciate both visual and auditory art then i would recommend shelling out a few dollars for this lesser-known masterpiece.. fun fun fun fun fun fun fun fun someone play with me and laugh at me as i die xd. nice program if you are streaming or recording videos i couldnt really find any other purpose and i also dont use the program its still good for its use you can import sounds and make keybinds to play them also its not too expensive and very easy to use. Easily one of the best workouts you can have in VR, I really like this game... It's got great presentation and is a simple enough concept that anyone can give it a go... highly recommended!. I like this game..a little slow but not too bad. Game play and controls are pretty awesome. 8/10
